LOVELL PARK DEVELOPMENT FLOOD-PROOF HOME CONSTRUCTION UNDERWAY IN DICKINSON, TEXAS

Home elevation company, Planet Three Elevation (P3), has begun construction on a housing development to help the community in its flood mitigation measures.

Dickinson, TX, May 21, 2020 – Planet Three Elevation embarks on a new flood-proof housing development in Dickinson, Texas. Lovell Park Development provides above-the-floodplain elevated homes to replace repetitively disrupted housing in the city from flooding.

The homes are elevated 10 feet to accommodate Dickinson's garage requirements and to provide additional multi-purpose areas to optimize space and function.

"Mike Conrad, P3's Home Reconstruction Director says the "pile forest" installation enables rapid and simultaneous construction of several homes in advance of storm season."

The 1,426 square foot homes are built to standards specified by reconstruction grants. Construction of Lovell Park is expected to be completed in July 2020.

About Planet Three Elevation

Planet Three Elevation is the Gulf Coast expert in home elevation, home reconstruction, and new home construction; elevating homes and businesses from 1 to 25 feet above the floodplain for over 25 years. They have elevated over 1000 homes in Texas and Louisiana after hurricanes and other flood events and continue to work as a contractor to private homeowners and grant home elevation projects.
