FOR IMMEDIATE RELEASE
November 22, 2021

PLANET THREE ELEVATION HAS BEEN APPROVED AS A CONTRACTOR FOR THE HMGP GRANT PROGRAM IN GALVESTON COUNTY, TEXAS

Home elevation contractor, Planet Three Elevation (P3) is approved as a designated contractor to provide FEMA-funded home lifting for Galveston County homeowners.

Galveston County, TX, November 12, 2021 – Dickinson-based Planet Three Elevation will begin to work with Galveston County for residential elevation projects that will occur in 2022 after years of repetitive flooding disasters. Funding is provided through FEMA's Hazard Mitigation Grant Program (HMGP).

Residents in multiple areas of Galveston County will benefit from the HMGP Grant. After some of the highest flooding recorded in decades, multiple counties in Texas have required a better solution to flood mitigation efforts. HMGP programs are designed to reduce the overall risk to the population and structures from future flooding events, while also reducing reliance on federal funding in future disasters. In addition, most homes will benefit from lower flood insurance premiums once the work is completed.

We can't stop the rising water, but we can safely lift your home with expertise and precision; removing it from repetitive flood loss. This is a problem Planet Three Elevation can solve.

-Wayne Fairley, Planet Three CEO

Through this HMGP grant program, homes will be elevated above FEMA's base flood elevation to avoid future flooding and to provide peace of mind to the Galveston County residents.

These home elevation grant programs provide for lifting the existing home, structural support, utility restoration, stairs, and landings and may include additional elements.

About Planet Three Elevation

Planet Three Elevation is the Gulf Coast expert in-home and structure elevation, home reconstruction, and new home construction; elevating homes and businesses from 1 to 25 feet above the floodplain for over 25 years. The P3 Team has elevated over 2000 structures nationally after hurricanes and other flood events and continues to work as a contractor to private homeowners and grant home elevation projects. Planet Three offices, technology center, and warehouse operations reside in Galveston County.

About the Galveston County Grant Home Elevation Program

FEMA awarded Hazard Mitigation Grant Program funding to the State of Texas to elevate residential structures above the risk of repetitive flooding. FEMA's Hazard Mitigation Program assists States, territories, federally-recognized tribes, and local communities by providing funding to significantly reduce or permanently eliminate future risk to lives and property from natural hazards. Funding resources become available following a major disaster declaration. Typically projects are funded by a combination of Federal and non-Federal funds. HMGP funds may be used to pay up to 75% of the eligible costs. This hazard mitigation project is part of FEMA's long-term commitment to help Texas and its communities recover from Harvey and become more resilient.
